

Agriculture Energy Savings Action Plan (AESAP)

SAVINGS FOR AGRICULTURE CUSTOMERS. The agricultural industry is extremely energy and water-intensive, and that's why Pacific Gas and Electric Company (PG&E) offers a variety of rebates, incentives, and financing options to help your operation reduce energy usage and costs. Upgrading ventilation, irrigation, and other critical systems with more energy-efficient options is one way to reduce your overhead, improve production, and preserve natural resources.

What we do

The Agriculture Energy Savings Action Plan (AESAP) provides qualifying agribusiness owners with technical assistance, rebates, and financing for energy-saving products installed throughout your agriculture facilities. We:

- ✓ Help you identify energy-efficiency improvements and other cost-cutting opportunities
- ✓ Provide rebates for qualifying equipment installations and replacements
- ✓ Offer custom incentives based on energy savings

Who we serve

The AESAP provides free services and incentives to agricultural electric and gas customers in the PG&E service area. Eligible agriculture operations must already pay the Public Purpose Program (PPP) charge on their energy bill.

Ag sectors served:

- Crop Production & Irrigation
- Greenhouses & Indoor Horticulture
- Breweries, Wineries and Distilleries
- Dairy & Livestock

Program Offerings

Rebates

Rebates are a fixed dollar amount based on the quantity and/or capacity of the energy-efficient equipment installed. The advantage to rebates over custom incentives is that there is no pre-approval process to wait for. Send us completed invoice documentation, and TRC will verify the installation and process the rebate.

Custom Incentives

Have a special project in mind? Our team of experts can help you identify energy-saving opportunities and incentives. Custom opportunities receive cash incentives based on the amount of energy your project saves. In addition to retrofits, customized incentives are available for retro-commissioning activities such as setpoint changes, new load added equipment, as well as modifying existing processes to improve overall kWh or therm per unit produced.

Common Energy-Efficiency Projects

Common energy projects for include but are not limited to:

- High-efficiency fans and VFD's
- High-efficiency refrigeration, HVAC and dehumidification
- Condensing boilers and controls

Financing Options

On-Bill Financing

PG&E offers On-Bill Financing to help eligible customers pay for energy-efficiency retrofit projects with 0% interest. Loans range between **\$5,000** and **\$4,000,000** per premise, with loan periods of up to 120 months.

On-Bill Repayment

Eligible medium and large business customers who do not qualify for the On-Bill Financing program can finance qualifying measures with privately funded loans that are repaid through their monthly utility bill.

GoGreen Financing

Administered by the State of California and supported by the state's investor-owned utilities, the Small Business Financing (SBF) program offers financing with attractive terms for energy-efficiency improvements to businesses. SBF's participating finance companies offer quick approval on leases, loans, and service agreements with monthly payments to meet your budget. Visit **GoGreenFinancing.com** to learn more.
