

Rebates for Crop Production & Irrigation

The **Agriculture Energy Savings Action Plan (AESAP)** provides qualifying agribusiness owners with technical assistance, rebates, and financing for energy-saving products installed throughout your agriculture facilities. Our team can guide you through California's evolving energy efficiency program regulations, ensuring your top projects are approved, funded, and installed.

Savings for Crop Production and Irrigation Operations

Crop production can be extremely energy and water intensive, placing a large financial burden on farms. Our team can work with farms to drastically reduce energy costs and guide you through evolving energy efficiency program regulations, ensuring your top projects are approved, funded, and installed.

How AESAP can help

Through AESAP, agribusiness owners can qualify for rebates and technical assistance for energy project upgrades, including Irrigation Pump Variable Frequency Drives (VFDs). VFDs can improve pump efficiency, reduce energy consumption, and extend equipment life. In addition to these energy savings, AESAP participants can also benefit from PG&E's demand response programs, which offer opportunities to reduce energy costs by shifting or reducing operations during peak periods. By combining energy-efficient upgrades with demand response, you can maximize savings and improve your facility's overall energy management.

What we do

All of our services are of no cost to the customer.

Customized program solutions include:

- ✓ Conducting detailed technical studies
- ✓ Preparing and submitting pre- and post-installation incentive report and supporting documentation
- ✓ Managing PG&E's technical review and/or CS EAR
- ✓ Project supplier and installation support
- ✓ Conducting measurement & verification (M&V)
- ✓ Cutting and delivering the incentive check

Program Offerings

Rebates

Rebates are a fixed dollar amount based on the quantity and/or capacity of the energy-efficient equipment installed. The advantage to rebates over custom incentives is that there is no pre-approval process to wait for. Send us completed invoice documentation, and TRC will verify the installation and process the rebate.

Custom Incentives

Have a special project in mind? Our team of experts can help you identify energy-saving opportunities and incentives. Custom opportunities receive cash incentives based on the amount of energy your project saves. In addition to retrofits, customized incentives are available for retro-commissioning activities such as setpoint changes, new load added equipment, as well as modifying existing processes to improve overall kWh or therm per unit produced.

Financing Options

On-Bill Financing

PG&E offers On-Bill Financing to help eligible customers pay for energy-efficiency retrofit projects with 0% interest. Loans range between **\$5,000** and **\$4,000,000** per premise, with loan periods of up to 120 months.

On-Bill Repayment

Eligible medium and large business customers who do not qualify for the On-Bill Financing program can finance qualifying measures with privately funded loans that are repaid through their monthly utility bill.

GoGreen Financing

Administered by the State of California and supported by the state's investor-owned utilities, the Small Business Financing (SBF) program offers financing with attractive terms for energy-efficiency improvements to businesses. SBF's participating finance companies offer quick approval on leases, loans, and service agreements with monthly payments to meet your budget. Visit **GoGreenFinancing.com** to learn more.
